### **DETAILED ACTION**

This office action is in response to applicant's amendment September 27, 2005.

#### ***Allowable Subject Matter***

Claims 2-11 and 13-20 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art does not disclose or make obvious etching down polysilicon lines that have sidewall spacers and depositing a metal overlying metal, annealing to completely convert the polysilicon to a metal silicide gate including all the limitations of an independent claim. In contrast, Wieczorek et al (U.S. 6,423,634) shows forming a polysilicon layer with sidewall spacers and subsequently forming a metal over the polysilicon, annealing to completely convert the polysilicon and removing the unreacted metal, but the spacers are formed larger than the polysilicon so the prior art does not disclose further etching down the polysilicon lines below its spacers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### ***Conclusion***

Art Unit: 2813

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art shows removing polysilicon lines to form metal silicide over the line.
